Replica Sales and Rentals

WWW.PROJECTEXPLORATION.ORG

Africa's first flying reptile, the African pterosaur is a close cousin of the dinosaurs but had a very different look and lifestyle. Based on numerous trackways, paleontologists believe pterosaurs were relatively clumsy on land, walking slowly on all fours. In the air however, pterosaurs were agile hunters and grew to sizes unrivaled by modern-day fliers like birds or bats.

## African Pterosaur

Type: pterosaur

Age: 110 million years old

Wingspan: 16 ft (4.88 m)

Discovery site: Niger, Africa

## Replicas Available

	SAE (feet)	Metric (meters)
Mounted Skeleton	7' x 20' x 2'	2.13m x 6.1m x 0.61m
Skull	2' long	0.61m long
Flesh Model	8' x 16' x 3'	2.44 x 4.88 x 0.91

Traveling exhibits are also available.
